Oct 28, 2021

CONTENTS:

1	Introduction	1
2	Code Structure	3
2.1	Object Representation Overview	3
3	Indices and tables	5

INTRODUCTION

A python library to create and use mzQC files. Specifically, the library facilitates access to mzQC files in form of a **directly usable object representation of mzQC** and offers additional functionality to:

- serialise
- deserialise
- syntactic checks
- semantic checks

CODE STRUCTURE

The library consists of three modules, the syntactic check module, the semantic check module, and the object representation module for (de-)serialisation.

2.1 Object Representation Overview

INDICES AND TABLES

- `genindex`
- `modindex`
- `search`
